

POST SEDATION INSTRUCTIONS

Patient can not drive, operate machinery, or undertake any activity that could be hazardous for 24 hours after sedation.

A responsible adult must be with the patient until the patient has fully recovered from the effects of the sedation and should stay with them that evening.

Patient may be sleepy or alert when they leave the office. Attend both sleepy and alert patients in the same manner. Do not leave them alone. The sedative can have an amnesic effect even on seemingly awake patients.

Patient must not go up and down stairs or walk unattended. (Support them at all times) Patient must stay on the ground floor until fully recovered.

Patient must not undertake positions of responsibility for 24 hours. (Care of children, etc.)

Patient must not make important decisions, legal or monetary for 24 hours.

Patient must not have alcohol or other sedatives for 24 hours.

Call us if you have any questions or difficulties. If you feel that their symptoms warrant a physician and you are unable to reach us,
